

Three Piece Case

The three piece case is made in two passes on the Kolbus Casemaker and can be made with different cloth colors or with printed covermount/cloth combination.

On the first pass, the entire board area is covered with the front and back panel cloth or printed covermount. The second pass through the casemaker adds the spine area cloth.

The customer specifies the cloth colors or printed covermount/cloth combination and the amount of spine area overlap on to the front and back panels.

Foil stamping, blind stamping, embossing, etc. is done on the made case by an outside supplier
